## Summary

Got a Master's Degree in Computer Engineering with a curriculum specialization called "Intelligent Cyber Systems", which focused on the SW development of systems in the context of computer vision, machine learning, web/mobile applications and computer security.

Worked as a research fellow at the AlmageLab Research Laboratory; my research activity had the goal to predict an urban scene from different perspectives combining computer vision, deep learning and 3D geometry. This work was related to the topic of his master's degree thesis.

Currently, I'm a PhD student at the International Doctorate in ICT (UniMoRe) with the following research topic:  
"Computer Vision and Artificial Intelligence for Collaborative Robotic Environments".

## Knowledge and computer skills

**Programming languages** Python, Javascript, HTML, CSS, Java, C, C++

**Libraries and Tools** PyTorch, NumPy, OpenCV, PyCharm

**Expertise** Computer Vision, Deep Learning, Machine Learning, Development of web/mobile applications
