Summary

I have 2+ years of experience in industry developing AI solutions for real-world industrial applications, and 5+ years of experience in deep learning research. My work has covered image reconstruction, diffusion models, semantic segmentation, 3D human pose estimation, and text-to-audio models. I earned a Ph.D. in Deep Learning and Computer Vision from University of Modena and Reggio Emilia in April 2024, focusing on 3D human-centric scene understanding and 3D object reconstruction. I am passionate about research and contributing to advancements in the field of Deep Learning.

Work Experience

ALLSIDES November 2026 – (Now)
Machine Learning Engineer Brixen, Italy

Covision Lab April 2024 – October 2026
Deep Learning Research Engineer Brixen, Italy

- **Activities**: Diffusion Models, Text-to-Audio Models, Discrete Tomography, Semantic Segmentation, Classification, 3D Pose Estimation

AImageLab (University of Modena and Reggio Emilia) May 2020 – April 2024
Research Fellow / PhD Student Modena, Italy

- **Activities**: 3D Object Reconstruction (neural rendering, NeRF), 3D Skeleton Pose Estimation

Education

University of Modena and Reggio Emilia November 2020 – April 2024
Ph.D. in Deep Learning and Computer Vision Modena, Italy

- **Thesis**: *From Images to 3D Space: The Role of Semantic Keypoints for 3D Perception*

University of Modena and Reggio Emilia September 2017 – February 2020
MSc in Computer Science Modena, Italy

University of Modena and Reggio Emilia September 2013 – February 2017
BSc in Computer Science Modena, Italy

Skills

Spoken languages: Italian (mothertongue), English (C1 certified), Spanish (B1)
Programming languages: Python (proficiency), C/C++ (basic)
Libraries & Tools: PyTorch, Numpy, OpenCV, ONNX, TensorRT, VSCode
Deep Learning: 3D Pose Estimation, 3D Reconstruction, Image Diffusion Models, Text-to-Audio Models, Image Reconstruction, Semantic Segmentation, Image Classification
